thinkWhere
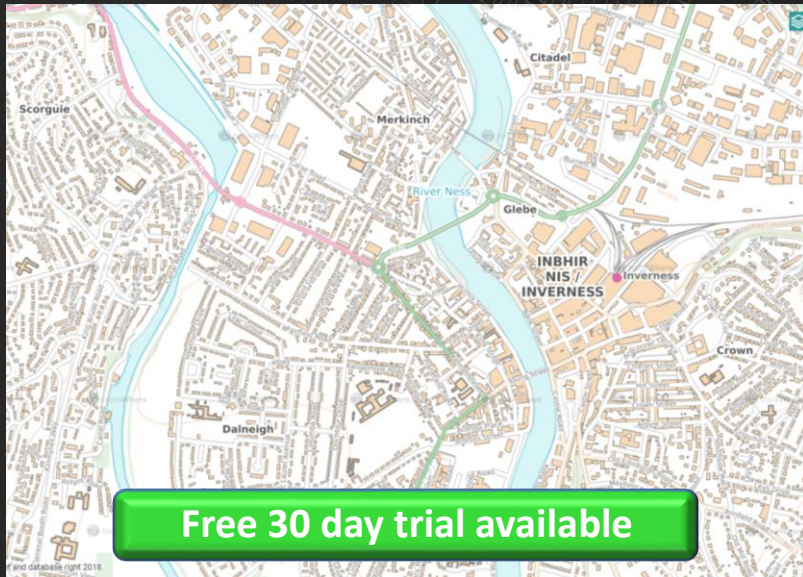

Data Services

powered by

theMapCloud

An online service providing instant access to hundreds of ready to use geographic datasets

Free 30 day trial available

Features

- Colour, backdrop and greyscale data layers

- Hundreds of up-to-date data products available

- Compatible with CAD and GIS software

- Easy to deploy

- Fast and reliable service

Benefits

- No need to store digital maps locally

- No need to maintain datasets in-house

- No need to source 3rd party data

- Highly performant and secure services

- Use the same data throughout your organisation

About

thinkWhere data services are a cost-effective alternative to in-house data management, and aim to significantly reduce your internal operational GIS costs for sourcing, managing and processing geographic data from third party data publishers.

"...Reliability and performance are excellent, and we have benefited from a significant reduction in the cost of maintaining our own OS data services."

IS Development Unit Manager
Scottish Environment Protection Agency

CERTIFIED OGC® COMPLIANT

Our data services mean you can immediately access hundreds of GIS-ready environmental, demographic and topographic data from data publishers including the Ordnance Survey, Environment Agency, Scottish Natural Heritage, Forestry Commission and Natural England. Simply plug-in your web and desktop GIS applications.
