Benefits

- Save on Ordnance Survey RRP

- Application ready data – no need to process

- Data available immediately on purchase

- Available 24/7/365

- Access to a wide range of maintained high quality data from a trusted and reputable service provider

About

mapTrunk

Our easy-to-use, self-service online map shop mapTrunk allows you to purchase Ordnance Survey Mastermap data in a range of application ready formats. An express service…simply download and use in your GIS and CAD systems. You can also create and buy .pdf maps for submitting with planning applications through mapTrunk. mapTrunk offers great savings with costs to buy lower than OSRRP.
Just visit **www.maptrunk.com**

"We chose to use mapTrunk as it's extremely straightforward to use, quickly delivers data directly to our inbox for immediate use in our projects and (as data is available at a discounted price) has saved us, and our clients money."
Director
Streetwise Services Limited

You can also buy OS Mastermap and other Ordnance Survey data products from us directly. As OS Licensed Partners we hold all the very latest OS commercial and open data products, and can provide data in a variety of formats.

Partner

Another option is our hosted data service. Served from our platform, theMapCloud, data services provide cost-effective dissemination of digital mapping across a whole organisation via the Cloud, meaning you don't need to worry about data processing, processing software, or data storage options, etc.

theMapCloud

mapTrunk

Under the hood

- Data services are available in British National Grid and Web Mercator projections as OGC compliant Web Map Service (WMS) and Web Map Tile Service (WMTS)

- Individual layers and zoom stacks available

- OS OpenData products are free-to-use and are used as background maps for displaying and navigating around mapTrunk including the most detailed street-level OpenData mapping available from Ordnance Survey.

30 day data services trial available

Data Services

Plug in a range of Ordnance Survey data products and gazetteers, as well as environmental, demographic and topographic data services into your web mapping and desktop GIS applications.

Download Data

Mark or upload your area of interest, view your quote and order data for use in GIS or CAD systems. Data is available in a range of formats including Shapefile, DXF and MID/MIF delivered to you quickly via email.
