

Training

thinkWhere offers a face-to-face professional training service, focusing on the use of Open Source GIS technologies including QGIS and PostGIS.

Features

- AGI accredited training
- Standard, run on demand and bespoke courses
- Scheduled courses run in Scotland and England
- Delivery on or offsite
- Fully documented

Benefits

- Learn from leading GIS professionals
- 30 days FREE post training support
- Offers and discounts available
- Great value for money
- Learn from Open Source GIS experts

About

Our Open Source GIS Training Courses and Workshops provide the skills, knowledge and expertise needed to maximise the benefits of GIS to your business.

Our specialisms are in Open Source GIS.

Having trained thousands of customers over the last few decades, thinkWhere can quickly and effectively provide trainees with new skills to take back into the workplace.

Training courses are developed in-house and delivered by thinkWhere's team of GIS consultants.

QGIS Courses

"Excellent course, excellent materials and trainer – great that demos differed from examples we worked through, and trainer made a great effort to discuss our individual needs for using QGIS in our own work settings."

Historic Environment Scotland

"Thoroughly enjoyed course, everything well explained and any problems and issues made clear. Excellent trainer."

NHS (Ayrshire and Arran)

"...this is the best training I have taken at any point in my academic career"

University of the Highlands and Islands

"Procedures were demonstrated on-screen. This made them really easy to both understand and follow"

MapAction

QGIS Beginner

Our two day introductory course covers basic GIS concepts. Learn simple techniques and processes to analyse and interpret spatial data in the very latest version of QGIS. The course is most suited to those who are new to GIS or who have experience in previous versions of QGIS.

QGIS Advanced

This one day course explores advanced techniques and processes for analysing and interpreting spatial data in QGIS. The course is most suited to delegates who already have a good working understanding of QGIS, or have attended our QGIS Beginner course.

QGIS Fast Track

This one day course provides an intensive overview of QGIS. Designed for experienced users of desktop GIS software who are looking to switch to QGIS, or who wish to learn about the features and functionality of the latest long term release of QGIS.

QField for QGIS

This one day course introduces QField as a mobile GIS solution. The course is most suited to delegates who already have a good working understanding of QGIS, or have attended our QGIS Beginner course.

PostGIS training courses

PostGIS User

This one day introductory course is ideal for those wanting to learn how to load and manage spatial data within PostGIS (PostgreSQL spatial extension). Topics cover geometries, projections, loading data, spatial querying and data visualisation.

PostGIS Administrator

In one day, our hands-on training course will teach you how to manage PostgreSQL/PostGIS databases, focusing on administrator topics such as database install, configuration, optimisation, assigning roles and user management.

Other courses

Run-on-demand

Some of our GIS training courses are run on demand. This includes training for our online GIS Location Centre.

Bespoke Training

We can also develop and deliver training courses to meet your own specific needs.
